Scientific horizon for international scientific cooperation of the Clinical Hospital "Feofaniya"

Clinical Hospital "Feofaniya" of State Administration, Kyiv, Ukraine

The Clinical Hospital "Feofaniya" of State Administration is a multiprofile highly specialized clinical hospital, is one of the most equipped with modern diagnostic equipment and innovative technologies in Ukraine. The Hospital administration and the medical staff are interested in any support and development of domestic science and international cooperation. In 2009 a department of science, international cooperation and control on quality of medical services was created for research support. In the Hospital "Feofaniya" three Doctors of Medical Sciences and 28 Candidates of Medical Sciences are working. Since 2007 the Scientific Council has been functioning in the Hospital.

Today, the Clinical Hospital "Feofaniya" staff is engaged in scientific work on their own diagnostic and medical base, provided with up-to-date medical equipment of the expert class and highly skilled medical personnel, modern systems of medical and scientific management for individually orientated highly specialized medical care. New computer technologies are actively introducing in the department of computer software programming and visual science.

Today they created the most favored conditions for international scientific cooperation in the field of surgical simulation (cardiosurgery, neurosurgery, orthopedics, urology, gynecology, angiosurgery), therapeutic treatment, cardiac, neurological and endocrinological profiles. The hospital has ceased to be a completely closed government establishment, but saved the best traditions of national medical science and is constantly introducing the latest achievements of domestic and global health.
