## **Actual Issues in Organization of Neurological Aid in the Clinical Hospital "Feofaniya"**

*Clinical Hospital "Feofaniya", State Administration, Kyiv, Ukraine*

Every 5 minutes one Ukrainian has stroke and every 12 minutes one of them dies of stroke. In Ukraine 100-110 thousand of strokes is registered annually, 37.4 thousands under the age of 65 years. 30-40% patients with stroke die within the first month. 20-40% patients after stroke require external aid. 10-15% patients, who survived, return to daily activity, which they had before stroke.

A scheme of rehabilitative aid to stroke patients:

In-patient level

- Center of General Neurology and Neurorehabilitation (40 beds);
- Department of rehabilitation and department of physical therapy.

Polyclinic level

- Neurological department;
- Day hospital;
- Rehabilitation center.

Sanatorium

- Sanatorium "Concha - Zaspa".
